New Zealand School Goes Green with Solar Power

A primary school in Wellington has become one of the first in the region to achieve 100% _____ energy. The school recently _____ 200 solar panels on its rooftops, which now provide all the _____ needed to power classrooms, computers, and lighting throughout the day.

The principal, Mrs Sarah Thompson, explained that the project was part of the school's commitment to protecting the _____. "We want our students to understand the importance of _____ living," she said. "By using solar power, we can significantly _____ our carbon footprint."

The solar panel system _____ enough power to meet the school's daily needs, with excess energy being fed back into the national grid. This initiative is expected to prevent approximately 45 tonnes of _____ emissions each year, which is equivalent to taking nine cars off the road.

Local _____ have praised the school's efforts, noting that such projects are essential in addressing _____ change. The wider _____ has shown strong support, with several local businesses now considering similar installations. Students at the school are already learning about renewable energy in their science classes, helping to inspire the next generation of environmental leaders.

Extension: On the back of this sheet, write three reasons why renewable energy is important for New Zealand's future.
