

Estimation and Division

Name: _____

Date: _____

Instructions: For each problem, first estimate the answer by rounding the numbers. Then solve the division problem accurately. Show your working.

1. $487 \div 6$

Estimate (round to nearest 10 or 100): _____

Working:

Actual answer: _____

2. $823 \div 9$

Estimate (round to nearest 10 or 100): _____

Working:

Actual answer: _____

3. $1,264 \div 4$

Estimate (round to nearest 100): _____

Working:

Actual answer: _____

4. $2,156 \div 7$

Estimate (round to nearest 100): _____

Working:

Actual answer: _____

5. $3,418 \div 8$

Estimate (round to nearest 100 or 1000): _____

Working:

Actual answer: _____

Reflection:

How close were your estimates to the actual answers? _____
