

Calculating GST on Purchases

Name: _____

Date: _____

Remember: GST (Goods and Services Tax) in New Zealand is 15%. To calculate GST, multiply the price by 0.15. To find the total price including GST, add the GST amount to the original price.

Part A: Calculate the GST and Total Price

For each item below, calculate the GST amount and the total price including GST.

1. Basketball - \$60.00

GST amount (15%): \$ _____

Total price including GST: \$ _____

2. School backpack - \$40.00

GST amount (15%): \$ _____

Total price including GST: \$ _____

3. Board game - \$80.00

GST amount (15%): \$ _____

Total price including GST: \$ _____

4. Running shoes - \$120.00

GST amount (15%): \$ _____

Total price including GST: \$ _____

5. Bluetooth speaker - \$90.00

GST amount (15%): \$ _____

Total price including GST: \$ _____

Part B: Word Problems

6. Sophie buys a desk lamp for \$50.00. How much GST will she pay?

Answer: \$ _____

7. James purchases a cricket bat for \$85.00 (before GST). What is the total price he pays including GST?

Answer: \$_____

8. A tablet costs \$200.00 before GST. Calculate both the GST amount and the final price including GST.

GST amount: \$_____

Final price: \$_____
